

# Don't lose the chance to put up to \$1015 back into your pocket this year!

Participating in a healthcare flexible spending account (FSA) is like receiving a 30% discount from your medical providers.

## How does a healthcare FSA work?

A healthcare FSA is a flexible spending account that allows you to set aside pre-tax dollars for eligible medical, dental, and vision expenses for you and your dependents, even if they are not covered under your primary health plan.

You choose an annual election amount, up to **\$3,300** <sup>\*2025 limit</sup>. At the beginning of the plan year, your account is pre-funded and your full contribution is immediately available for use. Your election amount is then deducted from your paychecks in equal installments throughout the year.

## Why should I enroll in a healthcare FSA?

Almost everyone has some level of predictable and non-reimbursable medical needs.

If you expect to incur medical expenses that won't be reimbursed by another plan, you'll want to take advantage of the savings this plan offers. Money contributed to a healthcare FSA is free from federal and state taxes and remains tax-free when it is spent on eligible expenses. On average, participants enjoy a 30% tax savings on their annual contribution. This means you could be saving up to \$1015 per year on healthcare expenses!

## How do I use my FSA to pay for healthcare expenses?

You can use your benefit card to pay your providers for eligible healthcare expenses, or pay with your personal funds and submit a claim for reimbursement.
